🏆 Rank : 483,894

CARRIER OBJECTIVE

I am a motivated and enthusiastic Computer Science student with a strong interest in developing web applications and software solutions. I am passionate about creating responsive, user-friendly, and efficient websites using modern web technologies. I am eager to apply my technical skills, continuously learn new technologies, and contribute to the success of an organization while growing as a professional web developer.

ACADEMIC CREDENTIAL

DEGREE	INSTITUTION	YEAR	PERCENTAGE
BE-CSE	Dr.N.G.P. Institute of Technology	2026 (Pursuing)	8.70
HSC	R G Matric Higher Secondary School	2024	87%
SSLC	R G Matric Higher Secondary School	2022	86%

TECHNICAL SKILLS

- **Programming Skills** : Java | Python | C
- **Frontend Technologies** : HTML | CSS
- **Backend Technologies** : Django
- **Database Technologies** : MySQL

AREA OF INTEREST

- Web Development
- Document Formatting
- Full Stack Development

PROJECTS

1. Structural Simulator (ArchiAI Pro)

ArchiAI Pro is a web-based structural simulator that assesses building resilience against Flood, Earthquake, Wind, and Combined disasters. It calculates real-time Structural Score, Resilience Index, Failure Risk, and Service Life, generates AI-powered recommendations with cost estimates, supports English and Tamil languages, and exports professional PDF reports—all in a free, browser-based tool with no installation required.

2. Alcohol Detection System

Built a software-based real-time alcohol detection system where input alcohol values are automatically generated using Python's random function to simulate sensor readings. The system monitors these simulated values and sends instant email alerts to multiple recipients when the threshold is exceeded. Features include a live dashboard with gauge meter and line chart, historical data storage with date filtering, search, bulk delete, PDF export, and dark/light themes. Utilized Flask-SocketIO for real-time WebSocket communication, SQLite for data persistence, and Chart.js for visualizations. Entirely software-driven with no physical hardware required.

INTERNSHIP

LIVE STREAM TECHNOLOGIES - MERN STACK

Gained hands-on experience in MERN Stack Development through a 15-day internship, working with MongoDB, Express.js, React.js, and Node.js. Developed practical skills in full-stack web application development, REST API integration, and database management.

ADDITIONAL SKILLS COURSE - PYTHON DJANGO

Successfully completed the Full Stack with Python and Django course during Jan – Feb 2026. Gained practical exposure to Python programming, Django framework, HTML, CSS, JavaScript, and database integration. Strengthened problem-solving and web application development skills.

ACADEMIC INVOLVEMENTS

- Full Stack with Python and Django
- IIT Bombay - Entrepreneur Workshop
- Google ADK Workshop
- TNWISE Women's Hackathon

PERSONAL DETAILS

- **Lingustic Skills :** Tamil , English
- **Address for Communication :** Salaipudur,Senjeriputhur(Po),Sulur(Tk),Coimbatore(Dt)

CAMPUSGUIDE AI - (ONGOING PROJECT)

Developed a full-stack AI-powered Campus Guidance System using HTML, CSS, JavaScript, Python Flask, and SQLite to assist parents, visitors, and newcomers in navigating the campus. The system features a multilingual chatbot (English/Tamil), voice input and voice output, and an interactive visual campus map for easy navigation. It provides real-time guidance to locate departments, offices, classrooms, laboratories, and campus facilities through a user-friendly interface. The application improves accessibility, reduces dependency on reception staff, and enhances the overall campus visitor experience.
